Cartster

Summary

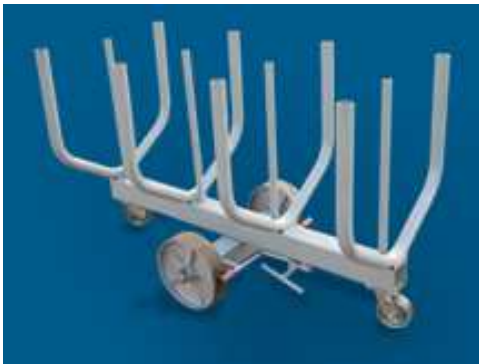

Cartster is an excellent solution to your lumber transport needs. These carts can maneuver in tight locations allowing wood to be transported where forklifts can not. They are easy to load from a conveyor without requiring stacking or banding. These carts contain two bays per cart allowing items such as top cords and bottom cords to be placed in the same cart for transport. A foot brake holds the cart stationary allowing easy removal of lumber after transport.

Advantages

- Foot brake will hold cart in position for loading and unloading
- Wood can easily be dumped into carts from a conveyor or saw
- Carts will hook together for easy transport in pairs to the assembly table
- Two bays per cart will allow two distinct board types to be place in the same cart

Specifications

- Width: 28"
- Height: 38"
- Length: 5'
- Bay width: 11"
- 30-35 2x4's per bay
